OC API Documentation : 0 - Examples - version 1.4.0

I.   Introduction

The aim of this document is to provide the basic knowledge to the developers working at or for a National Federation in order to use the Entry System 3 API (ES3 API).

The ES3 API is provided to automate the entries management between the NFs' IT system and the FEI's Entry System.

This document gathers examples concerning some endpoints. All examples use the Integration environment ES3 API.

II.   Examples

Basic implementation in PHP

```php
<?php
// Login information
$user_connexion = array(
    'username' => 'oc_ws',
    'password' => 'OC_WS'
);

// Session information
$user_fei = array(
    'username' => '10091632', // OC on Nice show (integraton)
    'password' => 'test1234'

);

// Login
$curl = curl_init();

curl_setopt_array($curl, array(
  CURLOPT_URL => "https://ies3-api.fei.org/login",
  CURLOPT_RETURNTRANSFER => true,
  CURLOPT_HTTP_VERSION => CURL_HTTP_VERSION_1_1,
  CURLOPT_CUSTOMREQUEST => "POST",
  CURLOPT_POSTFIELDS => json_encode($user_connexion),
  CURLOPT_HTTPHEADER => array(
    "Cache-Control: no-cache",
    "Content-Type: application/json"
  ),
));

$response = curl_exec($curl);
```

```php
$err = curl_error($curl);

curl_close($curl);

$data_response = json_decode($response, true);
$token_from_login = $data_response['token'];

$login_token = 'Bearer '.$token_from_login;
